Particularly salicylic acid and its chemical derivatives are very weak antiseptics, but powerful enough for a restricted antiseptis within the intestines and neighbor organs, without remarkable local harm. This local antiseptic influence of salicylates enables them to become antirheumatics where the rheumatism is a peripheric paraesthesia of an abdominal pathological infection. Salicylic acid or its derivatives never circulate in a sufficient concentration to influence peripheric muscles and their own local sensations. It concerns the blood of the vena porta principally. The chemical constitution of the blood is the basis too, for the perception of treatment of rheumatism in this new...
