Locke, Thomas, and O Hara08 reported that they had on their pneumonia service at the Boston City Hospital, ninety-four cases of lobar pneumonia in children under 15 years of age of which only four died. Forty-two cases were typed, and revealed that of these, eleven were Type I; five were Type II; four were Type III, and twenty-two were Type IV. Of the four fatal cases, two were untyped, one was Type I and one was Type IV. Because of the low mortality, no antipneumococcus treatment was given to those patients who were under 5 years of age. Armstrong 09 in England reported rather contradictory findings to those of the Boston investigators. He noted that the Type I pneumococcus, though responsible for many cases of lobar pneumonia in adults, does not appear to cause the disease in childhood. In only one case was...

Reviews

An exceptional pdf and the typeface utilized was fascinating to read through. It can be written in straightforward words and phrases instead of confusing. I am just quickly could possibly get a delight of looking at a written ebook.

-- **Prof. Arlie Bogan**

It is in a single of the best book. This is for those who state there had not been a well worth reading through. Once you begin to read the book, it is extremely difficult to leave it before concluding.
