BACTERIOLOGICAL INVESTIGATIONS OF THE IOWA STATE COLLEGE SEWAGE: REPRINT FROM PROCEEDINGS, IOWA ACADEMY OF SCIENCES, 1901 (CLASSIC REPRINT)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Bacteriological Investigations of the Iowa State College Sewage: Reprint From Proceedings, Iowa Academy of Sciences, 1901 As an introduction to the consideration of the Iowa State College sewage, the kinds of sewage, the necessity of disposal, and several of the most important methods with, their merits and disadvantages will be discussed. It has been my object in the following paper to bring together the data obtained from the bacteriological analysis of the college sewage, including daily samples from the effluent and weekly samples from the manhole and tank. Together with this data are given the daily temperatures of the air and of the sewage, at the time of taking samples; also, the soil temperatures, which were taken once a week. Besides this data it has seemed desirable to give the methods employed in the determination of the number of bacteria per cubic centimeter of the sewage. And lastly, a partial interpretation of the results obtained, has been attempted, special attention having been given to the percentage of gas producers present in the manhole, tank, and effluent, and to the fluctuations, during the different days and seasons, of the number of bacteria per cubic centimeter in the samples from the manhole, tank, and effluent. The determination of the species of bacteria present in the sewage has not been attempted, only incidentally. From a sanitary point of view there is no question of more vital importance than the proper disposal of sewage. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct...
